Professional Reviews

CHOICE Choice October 1, 2006

Wailoo and Pemberton (both, Rutgers) offer an informative book on the perils of genetics with regard to cultural issues related to genetic diseases. Specifically, the book deals with detailed accounts of the biological, social, and cultural profiles of three genetic conditions: Tay-Sachs, cystic fibrosis, and sickle cell disease. The authors discuss multiple aspects (read more)

The Troubled Dream of Genetic Medicine

Ethnicity and Innovation in Tay-Sachs, Cystic Fibrosis, and Sickle Cell Disease

Author Wailoo, Keith
Pemberton, Stephen
Publication Year 29 May 2006
Format Hardback
ISBN-13 978-0-8018-8325-5
ISBN-10 0-8018-8325-3

Summary

Why do racial and ethnic controversies become attached, as they often do, to discussions of modern genetics? How do theories about genetic difference become entangled with political debates about cultural and group differences in America? Such issues are a conspicuous part of the histories of three hereditary diseases: Tay-Sachs, commonly identified with Jewish Americans; cystic fibrosis, (read more)

Principles of Genome Analysis and Genomics

S. B. Primrose

检查状态

With the first draft of the human genome project in the public domain and full analyses of model genomes now available, the subject matter of 'Principles of Genome Analysis and Genomics' is even 'hotter' now than when the first two editions were published in 1995 and 1998. In the new edition of this...
